

Software Engineer (Fully Cleared)

Title: Software Engineer (Fully Cleared - AMAL)

About the job:

The qualified candidate must have full stack development, Php/Javascript, and MySQL experience. Additional experience with Ruby on Rails (or similar) development, and JSON data file creation and processing experience, and experience utilizing/developing REST APIs is desired.

Requirements:

- Fifteen (15) years of experience in software development/engineering, including requirements analysis, software development, installation, integration, evaluation, enhancement, maintenance, testing, and problem diagnosis/resolution.
- Shall be able to communicate directions and provide guidance to programmer/analysts, as required.
- Four (4) years experience out of the most recent five (5) years as a software development or lifecycle support lead or subsystem top level contributor on mission critical 24 by 7 SIGINT productions systems in one of the following areas:
 - Voice or video processing system requiring ingest of multiple audio and video formats, playback to end users, storage, and retrieval. Transcription systems requiring input, synchronization and linkage with original content, storage, and retrieval.
 - Field deployable voice processing systems including data capture of multiple audio formats playback, ingest, storage and retrieval.
 - Average ingest, storage, content search and retrieval of 500GB/day or more of multilingual text.
 - Distributed Peer to Peer content storage and retrieval systems with more than 500 nodes
 - Metadata indexing, metadata summarization, content and metadata data mining, visualization and analytics.
- Four (4) years experience out of the most recent five (5) years developing solutions which integrated or extended COTS or GOTS products.
- Four (4) years experience in evaluating project needs, determining tasks and durations, allocating resources, generating and reviewing designs for technical accuracy, completeness and appropriateness in light of objectives, budget, and schedule, on MD Agency projects.
- **Clearance: Applicants must be U.S. Citizens possessing an active TS/SCI security clearance with a Full Scope Polygraph.**

Specialized Requirements:

- Six (6) years of demonstrated experience out of the most recent eight (8) years developing production software for one of the following environments: Windows .NET, Solaris, or Linux OS.
- Six (6) years experience in developing systems performance, availability, scalability, manageability, and security requirements for mid to large scale system/programs.

Location: Annapolis Junction, MD area.

About us: Collaboration is the fusion of people and ideas toward a common goal; and at CollabraSpace it's part of everything we do. It's the foundation upon which Collabrapace was created, at the core of our corporate philosophy, and even represented in our logo where different pieces of one circle work

Software Engineer (Fully Cleared)

together. As a technical services and product company, CollabSpace supports the critical mission of our nation's security through ongoing collaboration with our team members, customers, and partners.

Across our 20+ programs we provide enterprise software development solutions and real-time collaboration to both government and private industry. CollabSpace is headquartered in Annapolis Junction, MD, close to the majority of our work and therefore, close to you.

CollabSpace Facts:

- **Team.** At CollabSpace, we truly believe in the team. We'll always do our best to find a position that makes you happy to go to work every day, support the charitable causes that are important to you, and encourage your involvement with the company by providing events for the whole family.
- **Security.** We offer competitive salaries but more than that, we make sure the salary we are offering you can be supported by multiple programs. Why is that important? See bullet #1; if you're not happy we will do our best to find something that does make you happy.
- **Benefits.** Our comprehensive benefits package means you pay very little for a full suite of coverage.
 - 100% company paid premiums for Health and Dental plans for employees and eligible dependents.
 - 100% company paid Life & Disability plans.
 - 401(k) & Roth plan with company contribution immediately vested.
 - Annual bonus plan, spot bonuses for a job well done, and referral bonuses.
 - Paid Time Off (PTO) allowing you to use your time off as you see fit.
 - Formal education and training benefits.
- **Transparency.** You have heard it before but here you'll truly experience it. The management team "puts it all on the table" and always has an open door.
- **Training and Education.** It's part of our collaborative environment. Besides the traditional off-site training which we pay for upfront, CollabSpace offers in-house Technical Exchanges on a range of topics presented by our own technical staff or industry partners.
- **Honors.** We earned the *Alliance for Workplace Excellence Award for 4 years running* and have been named to the *Baltimore Sun's Top 100 Workplaces 2013, 2014, 2015, and 2016*; an award given based on survey responses from our team members. We are consistently ranked as one of the *Top IT Firms in Baltimore* by the Baltimore Business Journal.

CollabSpace is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, religion, color, national origin, sex, age, sexual orientation, gender identity, genetic information, marital status, physical or mental disability, medical condition, veteran status, or any other factor determined to be unlawful by federal, state, or local statutes.

Make a life at CollabSpace, not just a living!
